THE
SCHOOL OF HEALTH®

Nourish yourself! Learn the basics of nutrition from the comfort of your own home. Take care of your family's health in everyday situations. Learn the 14 principles of a nutritionally balanced diet and nutritional support for common conditions. Course includes case studies, health questionnaire, supplements and movie lectures.

This introductory course in nutrition will support you in understanding the basic principles of achieving a healthy whole food diet and to gain an awareness of the connection between food and health on all levels of your being.

It will enable you to make choices for your own health and lifestyle and those of friends and family. Making the links between nutrition and health and looking more in depth at specific conditions in relation to diet, you can begin to make lasting changes to your health.

This course is aimed at those with little or no prior knowledge of the field of nutrition. Study at home at

your own pace. Learning is aided by self-assessment questions with full assessment and then certificate. Throughout the course, you will learn the 14 principles of a nutritionally balanced diet and look at 12 conditions that can be supported through nutritional and lifestyle changes. Course includes 12 case studies.

We take you step by step through the basics of 'Wholefood' and 'Healthful' nutrition, exploding a few myths along the way and embracing the amazing potential of healing the body through food. Once you have completed the course you should be able to make clear food and lifestyle choices to support health through yours and your family's life stages.

“Very helpful kit - you actually feel yourself getting more knowledgeable. I felt very satisfied and a great sense of achievement when I finished the course.”

Georgie, Nurse

Part 1 : The influence of Nutrition on health

The goal of a healthy body and mind is one that we can all aspire to, but how does what we eat and drink really affect this? This section helps you make the links between the choice of what we take into our bodies affects its function at all levels of our being. It also provides a basic understanding of the digestive process and various specialist diets you may encounter.

Part 2 : 14 Principles of a Nutritionally Balanced Diet

Here we examine 14 principles that will support your journey to achieving a nutritionally balanced diet. From the need for adequate levels of water, to superfoods and the overall impact of stress and how this affects our digestion and our nutrient requirements.

Part 3 : Nutrients in Focus

This section looks at the role of the many nutrients we consume through food. Exploring each vitamin and mineral and listing its food sources that you can increase through your diet. It also covers the different life stages and how our nutritional needs change as we progress through life.

Part 4 : Nutritional Support for 12 Common Conditions

Here we take a look at 12 common conditions that you, friends or family may experience. We look at the background to each condition and how optimising our nutritional intake of various nutrients could support.

Part 5 : Case Studies

This is where you can begin to put the information you have learnt into practice and plan out nutritional

suggestions for a range of fictional people, presenting with a range of health complaints. These may resemble people that you know or even yourself and give an opportunity for further learning as you work out a plan to support each.

Entry requirements

No prior medical training is required, we provide everything that you will need. There are no pre-entry qualifications or age requirements.
